Kampus Astro goes to SMS Sri Nangka

TUARAN: Kampus Astro brought world class quality education and learning to SMK Sri Nangka here with an outreach programme on June 27.

The eight-week programme is aimed at providing on-ground learning experience to students living in remote areas by visiting various schools in East Malaysia.

This is in line with the Ministry of Education's efforts to bring holistic learning experiences to young students

through on-ground events that will provide greater exposure to world class educational and informative content.

Kampus Astro, via its corporate responsibility outreach programme, will be visiting 30 rural and suburban schools in East Malaysia on weekends with a 25-foot mobile truck that houses informative and learning based activities for children and youths in particular.

Astro learning and informative chan-

nel partners that are participating and supporting the outreach programme are Astro TVIQ, Astro Ceria, Discovery Channel, Discovery Science, Animal Planet, National Geographic, The History Channel and Disney Channel.

To support the campaign further, Astro has collaborated with the National Science Centre to conduct mathematics and science based experiments and activities, as well as training materials.
